Dear Fellow Enthusiast: As you can see, we have an all-new catalog dedicated exclusively to Jeep and Jeepster, including the CJ Series and Wrangler. Due to the continuing popularity of these cars, we thought it best to start issuing new catalogs dedicated to makes and models to help our distributors and end-users find the restoration parts they want and need. Additionally, we have a large offering of rubber parts for Jeep and Jeepsters and want to ensure that you have the information you need at your fingertips. If you want to know the parts we offer for specific model years, please visit our website at www.metromp.com. There you can create and print-out a custom catalog for any model car you are working on and instantly know exactly what is available from Metro Moulded Parts, Inc.! In addition to this parts catalog for Jeep and Jeepster, we are working on numerous others that will support the most popular automotive lines in the restoration marketplace. Please contact your Customer Service representative to request catalogs for other car models or to ask about new part offerings.

Don't let anyone tell you there's no difference in rubber parts! Here at Metro, we continue to work hard to make our premium quality OEM reproduction and restoration parts the very best available by paying careful attention to the smallest details. Compare our products before buying any other brand! We're sure you'll find our parts give you the best overall value when you compare softness, appearance, fit, performance, durability and warranty. Attention to quality and detail are what we call "The Visible Difference." Prove it to yourself by comparing brands. We welcome the challenge!

To all of you who helped make Metro Moulded Parts, Inc. the leading supplier of restoration rubber products, our sincerest

Thanks!!

Jeep Molded Door Seals!

If you love your Jeep, you're sure to love these beautiful, OEM-replacement molded door seals. Complete with tough, Nylon 6-6 mounting pins and all the end details lovingly re-created!

LM 90-L

LM 90-R

'66-'73	Commando ('66-'67), Jeepster ('66-'73). Molded door seals. Made with molded ends, clips and all details. Fits all Commandos, hardtops and pick-ups. <i>See RR 9670 on pp. 4 for roof-rail.</i> Pair. R&L.	LM 96

Jeep Roof-rail Seals!

Roof-rail seals fit into the channels or spaces provided in the roof-rail of hardtop vehicles, providing an upper seal for the top of the side window. This is one of the "dynamic" seals that prevent wind, water and noise from entering the passenger space. Since rubber ages at about the same rate, when you are replacing the door seals on your Jeep, you should consider replacing the roof-rail seals at the same time.

Lifetime Warranty? Well ... Maybe

Don't be fooled by claims of "Lifetime Warranty" on the rubber parts you buy! "Lifetime Warranty" is a legal term that defines a period of use set by law that varies by state. It can be as little as three years. Metro SUPERSOFT® weatherstrip, seals and detail rubber parts come with a 15-year Full Replacement Guarantee. We promise that if your Metro-made part fails at any time during that time we'll replace it free of charge. That's our "No Hassle" guarantee. Don't settle for a simple promise of satisfaction. Metro's warranty is the best you can get! Bar none!

The Quality is in the Details!!!

Metro SUPERsoft® brand Sponge Rubber has a uniform, closed-cell microstructure that forms an outer skin free from exposed cells and flaws. Unlike competitor's products that are coated with an outer latex skin, SUPERsoft® brand Sponge Rubber seals won't bruise, gall, blister, glaze, crack or peel.

SUPERsoft brand Sponge Rubber has regular patterns of self-enclosed microcells that seal out moisture and harmful ozone. (100x microphotograph)

Competitive products have irregular structure with dense areas and open areas ... producing a harder seal and creating worm-holes that trap moisture and ozone. (100x microphotograph)

SUPERsoft brand Sponge Rubber has an integrated, smooth outer skin that is the first defense against the damaging effects of UV light, moisture, ozone and chemical aromatics. (50x microphotograph)

Competitive products have skin with shingles and surface tears that provide paths for moisture and gases to penetrate. (50x microphotograph)

Fast Fact: Most of Metro's detail dense rubber parts are molded in large presses at 50-120 tons of pressure to produce jet-black parts with smooth surfaces and precise details. Our molds are milled from single metal blocks to tolerances of 0.001 in. to minimize flash lines in finished parts. Mold cavities are polished regularly to produce parts with high luster and smooth contours. Computer-controlled temperature and cure cycles eliminate under-cured and scorched parts that last longer and perform better.

The Metro Difference!

Some people think a rubber part is just a rubber part. But there's a world of difference! SUPERsoft® brand weatherstrips and seals are made from a proprietary rubber formula that took years to perfect. Our molds are designed using CAD/CAM technology and machined to the closest tolerances using state-of-the-art CAD/CAM design

*and CNC milling tools. Numerical temperature and pressure controls ensure consistent cure cycles that eliminate scorched and under-cured parts. Hot-bonded joints and tough Nylon 6-6 mounting pins ensure your seal will stand up to rough handling. Besides quality in design and construction, our seals are up to 35% softer than other brands. **That's a difference you can see and feel!***

Most Items Ship the Same Day!

Manufacturing and sales take place at our central facility in Minneapolis, Minnesota. From a well-stocked warehouse to computer processing of your orders, we're committed to providing you with both the highest quality product and complete service support.

Jeep Window Detail Parts!

Why Not Do It Right the First Time?

*Consider what it costs you in time, money and aggravation to do something over. When you consider how much time and effort you've already invested in your restoration project, does it make sense to skim on the rubber? There's poor quality stuff out there. The difference in cost is a few dollars per set of seals. But what does it cost you in the long run to buy cheap? Drilling holes ... replacing broken pins ... adjusting and re-adjusting doors and windows. Not to mention replacing the seals in a few years when they fail. And they will fail. Don't settle for less! Find out what you are getting for your money and **ASK FOR METRO QUALITY!** You'll be glad you did. There truly is a **Visible Difference ...***

***Proudly Made in

Working on a Different Car?

Get a free **Custom Catalog** of Metro parts for any vehicle we support by visiting our website at **www.metrommp.com** and clicking on "Search For Parts." Or call us and we'll print one for you and mail it free.

Insist on Metro Quality!

Ask for Metro by Name!

At Metro we believe that quality parts go beyond 'just working.' We formulate rubber to meet the requirements of the part, instead of using cheap, commodity bulk rubber for all applications. Our standards include coated, molded-in steel cores, correct tool-installed clips and beautifully detailed outer surfaces. We even re-create details from the original parts that won't be seen once the part is installed! All of our standards are necessary to provide you with show-quality results. Don't settle for less! Find out what you are getting for your money and ASK FOR METRO QUALITY. You'll be glad you did. There truly is a **Visible Difference ...**

Fast Fact: The various dense rubber parts used on an automobile (e.g., body cushions, tail-light gaskets, quarter-window seals, convertible top-rail seals, etc.) all have different properties such as hardness, surface texture and tractability needed to work properly. Some manufacturers use a low-cost, generic rubber compound for all their dense rubber parts, regardless of the application. At Metro, we use only rubber compounds that are specifically formulated for the part application. We use no bulk fillers that can weaken the part and no accelerants during molding that cause parts to age prematurely. Get the facts and you'll find out ... there truly is a **Visible Difference ...**

Restoration experts know that cutting corners can cost them a lot in the long run. At Metro, we don't cut corners. We use only galvanized, corrosion-resistant metal cores. Our rubber formulations contain no filler materials and are designed to match the specific application of the parts we make. We use only tough, hardened nylon mounting clips and countersunk steel positioning pins of the correct profile in all our seals. CNC-machined molds and computer-controlled cure cycles produce smooth parts with a sleek, jet-black, non-fade finish that look better, perform better and last years longer than anything else you can buy! And we back all of our parts with a "No Hassle", full-replacement, 15-year warranty. That's why Metro Moulded Parts has been the first choice of restoration experts for decades.

Compare Metro's parts to any of our competitors' parts and you'll quickly see and feel which product is superior in looks, performance and durability. Try it yourself. Do a point-for-point comparison on the items listed below and you'll soon see the quality advantage is with Metro!
