Metro SUPERsoft® brand Sponge Rubber has a uniform, closed-cell micro-cell structure. Unlike competitor's products that are coated with an outer latex skin, SUPERsoft® brand Sponge Rubber seals won't bruise, gall, blister, glaze, crack or peel.

SUPERsoft brand Sponge Rubber has regular patterns of self-enclosed microcells that seal out moisture and harmful ozone. (100x microphotograph).

Competitive products have irregular structure with dense areas and open areas ... producing a harder seal and creating worm-holes that trap moisture and ozone. (100x microphotograph)

SUPERsoft brand Sponge Rubber has an integrated, protective surface that resists the damaging effects of UV light, moisture, ozone and chemical aromatics. (50x microphotograph)

Competitive products have skin with shingles and surface tears that provide paths for moisture and gases to penetrate. (50x microphotograph)
